Project Requirements Checklist

Flask Python Web Application

To ensure your project starts smoothly and meets all your expectations, please provide the following information:

1. Core Features

■ What main functions do you need?

■ How many user types/roles?

■ Do you need an admin panel?

■ What are the key workflows?

2. Database Needs

■ What kind of data will you store?

■ How many different data types?

■ Do you have existing data to import?

■ Expected data volume?

3. Design Requirements

■ Any specific color scheme?

■ Mobile-responsive needed?

■ Any website design references?

■ Logo and branding materials?

4. Technical Needs

■ Where will you host the application?

■ Need email functionality?

■ Any third-party integrations?

■ Performance requirements?

5. Security Requirements

■ User authentication method?

■ Data encryption needed?

■ Compliance requirements (GDPR, etc.)?

■ Access control levels?

6. Timeline & Budget

■ When do you need this completed?

■ Any specific milestones?

■ Budget constraints?

■ Need ongoing maintenance?

Note: The more details you provide, the better I can tailor the solution to your needs! Please feel free to add any additional information or requirements not listed above.
